Victor Bărbuță

Information Security student, UTM (2026 – 2030) · Looking for a SOC / Blue Team internship
victor.barbuta@outlook.com · Chișinău, Moldova
linkedin.com/in/victor-barbuta-a0b69b2b9 · github.com/vicuvi1 · tryhackme.com/p/vicuvi1 · t.me/vicuvi27

AVAILABILITY

Where: On-site in Chișinău, hybrid or remote · Shifts: Day shifts and weekends

HIGHLIGHTS

- **TryHackMe:** Top 3% worldwide, 140+ rooms, SOC Level 1 path completed
- **HackTrone:** 4th of 12 teams with team NAVI, international cybersecurity competition, Sep 2026
- **GigaHack:** Team NAVI went from one web host to five domains. My role: operator/support, notes and timeline
- **Registru Digital:** Replaced a paper library register. My mother uses it every day

SECURITY WORK

GigaHack 2026, Red Team CTF

An authorized red-team competition on a shared practice lab: seven teams, one weekend, clear rules. Nothing touched real systems. My takeaway is a defender's one: watching these attacks from the inside is the fastest way to learn how to spot them. The lead operator drove the main work. I helped with early reconnaissance, kept the notes and timeline that became the team's report, and followed each stage so I understood it. Industrial-control (OT/ICS) systems sat on the same reachable network as ordinary office machines. This flat-network risk is exactly what a blue team exists to catch.

SKILLS

- **Phishing email analysis** (used in guided labs): CyberChef
- **Network and traffic analysis** (used in guided labs): Wireshark, Nmap, TCP/IP, DNS, HTTP
- **Operating systems and labs** (used in guided labs): Linux, Kali, Ubuntu, Windows, Bash, VirtualBox, VMware
- **Programming** (used in projects): Python, C, C++, SQL, JavaScript, HTML, CSS
- **Access control and data safety** (used in projects): Supabase Auth, row-level security
- **Development workflow** (used in projects): Git, GitHub, pull requests, Vercel, Claude Code, Cursor
- **Learning next:** SIEM and log queries

CERTIFICATES AND TRAINING

- **TryHackMe**, 2026: Pre Security, Cyber Security 101 and SOC Level 1 paths completed. 140+ rooms, 25 badges.
- **pwn.college**, 2026: Completed Introduction and Linux Luminarium (command-line practice).
- **Certiport IT Specialist**, 2024: 3 certifications: Python · Device Configuration & Management · Databases.
- **Cambridge English**, 2025: International certificate, B2 level.

PROJECTS

- **Finance Helper**: A private personal-finance app that replaced my budgeting spreadsheet: 5-second expense logging, smart category rules and a single "safe to spend today" number. github.com/vicuvi1/Finance-Helper-App
- **Life OS**: My operating system for goals, projects, tasks and habits: a dark-mode morning dashboard that shows the 3 things that matter today. github.com/vicuvi1/life_os
- **Registru Digital**: Replaced a paper library register with a web app my mother uses every day. Built with data safety in mind: login, history, and saving that survives a lost connection. github.com/vicuvi1/mother_app_registru

EDUCATION

- **Technical University of Moldova (UTM), FCIM**, 2026 – 2030: B.Sc. Information Security (expected 2030)
- **"B. P. Hasdeu" Theoretical High School, Drochia**, 2023 – 2026: High school diploma

LANGUAGES

Romanian: Native · English: Certified B2 (Cambridge), working level C1 · Russian: B2

OUTSIDE SECURITY

Taekwondo black belt (2026) · National checkers champion (2019 – 2023)
